# ***FEEDING GUIDELINES***

## **PLEASURE HORSE**

### **For All Classes for Horses**

Wendland Pleasure Horse Diet is a 12% sweet feed specially formulated for adult horses.

- Designed for pleasure horse from ages 2 and up.
- Provides a complete and balanced diet when fed with hay or pasture.
- Sweet feed for enhanced palatability.

#### **Pleasure Horse**

#### **Daily Roughage**

<ul style="list-style-type: none"> <li>• <b>Idle in Pasture</b></li> <li>• <b>Ridden Occasionally</b></li> <li>• <b>Light General Use</b></li> </ul>	<p>1.25 lb to 1.5 lb per 100 lb of body weight per day. Adjust the amount of Wendland's Pleasure Horse Diet depending on condition desired and activity level of the horse.</p>	<p><b>Minimum of 1% of body weight per day.</b></p> <p>(ie: 1000 lb horse + 10 lb or more)</p>
--	---	--

- Keep fresh clean water available to your horse at all times except immediately after intense physical activity. Also, provide your horse with access to salt.
- Horses are designed to digest roughage, grass and hay, as the primary food source. Base all feeding programs on hay and/or pasture access. Roughage should make up at least 1% of the horses body weight per day, 50% of the horse's daily diet. Calculate feed amounts according to use of animal. See chart. *Note: When feeding alfalfa as part of the roughage ration, amount of feed may be slightly reduced.*
- Use a weight tape to weigh your horse for better accuracy.
- Weigh (using a scale) the amount of hay you are feeding to determine daily dietary need and weigh the amount of feed (not the scoop or container) you are feeding to determine true weight.
- Change to a new feed gradually over a period of at least 7 days.
- Divide daily food intake into at least two servings per day, more if possible.
- Store feed and roughage in clean, dry areas. Do not feed wet, moldy or insect infested product.
- Maintain a regular deworming program, have the horse's teeth examined annually and consult your veterinarian periodically.
