

**PREMIUM 27/18
PERFORMANCE/HIGH PROTEIN FORMULA**

Wendland's Premium Dog Food is a complete and balanced diet for pet with special nutritional needs. Wendland's Premium is soy-free, and contains a high level of meat and bone meal. It has a bite-size shape and the natural meaty flavor dogs love. No supplements are necessary when feeding Wendland's Premium, because every serving is a complete meal. Wendland's Premium is a natural, nutritionally balanced dog food that contains no added artificial flavors, colors or preservatives. Wendland's also has high levels of protein and fat to provide extra energy for active dogs. Carefully controlled processing of select, quality ingredients results in a highly digestible formula – which means less waste. **Animal feeding tests using Association of American Feed control and balanced nutrition for all life stages of the dog.**

FEEDING SUGGESTIONS

ADULT DOGS: Food requirements will very depending on breed, environment, temperament and stress factors. Show dogs and working dogs will require additional amounts of food depending on their degree of activity or stress. Food intake should be adjusted to maintain optimum body weight.

Follow the recommended feeding guide below or use the self-feeding method.

Feeding Instructions for average dog with normal activity

DOG SIZE	WEIGHT	DAILY AMOUNT
TOY BREED	3to 12 lbs.	½ to 1 ½ Cups
Small	13 to 25 lbs.	1 ½ to 2 ¼ Cups
Medium	26 to 50 lbs.	2 ¼ to 3 ½ Cups
Large	51 to 100 lbs.	3 ½ to 5 ½ Cups
Extra Large	100 + lbs.	5 ½ Cups
Amt. Based on std. 8 oz. cup		¾ Cup for each 10 lbs. of body weight over 100 lbs.

PUPPIES: Puppies may begin eating Wendland's Premium Dog Food at about 4 weeks of age. Feed puppies all the moistened food they will consume three times a day until six months old, then twice a day until nine months old. If fed moistened, serve no more than what the puppies will consume in a thirty-minute period to ensure product freshness. If fed dry, Wendland's Premium Dog Food may be kept before the puppies at all times. The amount fed should be sufficient to maintain steady optimal growth and weight, but not so much as to stimulate excessive growth and/or weight gain at an early age.

PREGNANT AND NURSING: Wendland's Premium Dog Food provides the extra nutrition needed by reproducing females in stages of gestation and lactation. Food consumption may vary during gestation, so feed the amount needed to maintain the pregnant female's good body condition. Food intake may double or even quadruple during lactation. For best results, supplements should not be added, except under the advice of a veterinarian.

FEEDING TIPS: Changes in your pet's feeding habits should be made gradually. When changing over to Wendland's Premium Dog Food, first substitute small amounts of Wendland's in place of your pet's current food. Then over the next week to 10 days, increase the amounts of Wendland's while decreasing amounts of his other food, until your pet has 100% Wendland' Premium Dog Food.
