

Sunglo Feeds Show Pig

Nutrition Program for the Young Show Pig

Our "Research Based... Show Ring Confirmed" feeds have been developed to meet individual animal needs.

Backed by the largest swine nutritional staff and research programs in North America.

Simulate

Pig Milk Replacer

- Designed to supply complete supplemental nutrition to very young pigs when milk supply is inadequate.
- Contains 26% protein, 18% fat
- Can be used in a recirculating milk system.
- Mix with water to make a solution similar to sow's milk.

First Response

A specialized ultra-small pellet designed to smooth the transition from sow's milk to dry feed.

- Highly palatable to encourage feed intake.
- Contains plasma proteins, lactose, and milk proteins at levels needed by young pigs immediately post-weaning.
- Can also be used as a creep feed before weaning.
- **FIRST RESPONSE** needs to be fed for a minimum of 5 days after weaning.
- 20% Protein, 1.6% Lysine, 9.0% Fat

800 Series

Pelleted Complete Starter Feed

- The INDUSTRY LEADER to "maximize bloom and sale readiness".
- Second stage feed that maximizes bloom on weaned pigs.
- Best if used after **FIRST RESPONSE** and until optimum bloom is obtained.
- Complete 1/8" mini-pellet
- 19% Protein, 1.4% Lysine, 5.5% Fat
- We recommend S-803 with CTC/Denagard for broad spectrum control.

700 Series

Pelleted Complete Feed

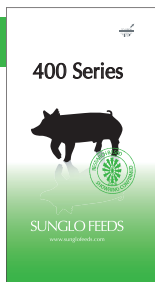

- A product series very similar to the 800 series above except designed for genetics that need less energy to maintain proper condition.
- Can be used as a late starter feed after feeding the 800 series.
- 19% Protein, 1.4% Lysine, 3.5% Fat

400 Series

Pelleted Complete Feed

- Third stage starter designed to continue growth and development while maintaining bloom.
- Complete 1/8" mini-pellet with CTC/Denagard for broad spectrum control.
- S-403 is cost effective for use after feeding the 800 series to maintain bloom and maintain a high percent sellable pigs.
- Typically used from 30 lbs to 100 lbs.
- 18% Protein, 1.3% Lysine, 5.5% Fat
- We also suggest S-403 as a very effective receiver feed due to its palatability and combination of medications.

General Feeding Recommendations Wean to Sale:

| | |
|----------------------|----------------|
| 1 Bag (per litter) | First Response |
| 1/2 Bag (per pig) | S-803 |
| 1 1/2 Bags (per pig) | S-403 |

For Even Better Starts and Performance!

- Pigs weaned at less than 17 days of age.
- Lightweight pigs.

Nutrition Program for Developing Show Pigs

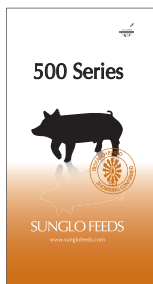

We offer 3 series options to provide proper nutrition during the development stage. Most feeders will pick one of these as their primary feed depending on genetics, sex and specific show condition objectives. The primary difference between the series are the lysine and protein levels. Standard products contain 100g Tylan (series numbers ending in "01" but other medication options are available upon request). See code system chart below.

100 Series

Pelleted Complete Feed

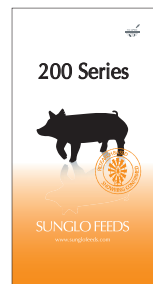

- 20% protein, 1.2% lysine, 5.5% fat.
- S-101 is the TRIED AND PROVEN complete show feed for maximum growth rate and expression of full genetic potential.
- Utilize this feed in the stage of growth where you want to continue with muscle mass growth.

500 Series

Pelleted Complete Feed

- Our most popular finisher diet.
- 18% protein, 1.0% lysine, 5.5% fat
- Lower protein option that still delivers performance with a soft fresh look while keeping showing muscle shape.
- S-505 contains Fenbendazole (Safeguard®) at 32.66 mg/lb to deworm show pigs.
- Feed 12.5 lb of S-505 per 100 lb of body wt. (normally 3-4 days).

200 Series

Pelleted Complete Feed

- 16% protein, 0.9% lysine, 5.5% fat.
- Feed of choice for tighter constructed, extreme muscled hogs.
- Offers a lysine and fat combination to moderate muscle and increase flesh or condition.
- Utilize later in feeding program. Many use on breeding gilts to encourage rib development.

Available in certain regions.

"A high end Sunglo meal feed with rigid manufacturing specifications combined with local manufacturing make this an economical choice".

- Offering 20G - 18G - 16G - 14G - Show Gilt versions that vary in their protein and lysine content.
- Also have nursery rations built from the Sector Base Program for breeders.
- Finally a high end ground feed with documented champions at state and national shows.

Show Feeding - Goals Sunglo Feeds - Solutions

Maximize growth rate for market barrows or gilts:

- Feed 5.75 lb S-101 or S-501 per day.
- + Feed 4 oz Explode per day last 3-4 weeks

Reduce body fat and maintain growth rate:

- Feed 3 lb S-101 or S-501 per day
- + Feed 1 lb Final Control per day
- + Feed 8 oz Full Tank per day

If enhanced muscle shape is desired:

- Follow procedure above
- Add 8 oz Explode per day last 2-4 weeks
- Or feed S-811 with Tylan and Paylean last 2-4 weeks

Aggressive toning and shaping:

- Feed 3 lb S-803 per day
- + Feed 1 lb Final Control per day
- + Feed 8 oz Explode per day last 2-4 weeks

Aggressive holding pattern while maintaining a fresh look:

- Feed 2 lb S-101, S-501 or S-201 per day.
- + Feed 2 lb Final Control per day.
- + Feed 1-2 lb Full Tank per day.
- + Feed 4 oz SUMO or Power Up per day.

Enhance body and condition:

- Feed 4 lb S-201, S-501 per day.
- + Feed 1 lb Full Tank per day.
- + Add 6-8 oz SUMO or feed 8-16 oz Power UP or 4-6 oz Fresh Energy per day.

Sunglo Feeds Code System

Show products may be ordered with a variety of medications and dewormers.

First digit indicates FEED SERIES:

Last 2 digits indicate MEDICATION OPTIONS:

| | | |
|-----|--------|-----------------------|
| 800 | [00] | Mecadox |
| 801 | [01] | Tylan |
| 803 | [03] | Denagard + Aureomycin |
| 804 | [04] | Lincomycin |
| 805 | [05] | Safeguard |
| 811 | [11] | Paylean + Tylan |
| 814 | [14] | Aureo SP-250 |

Non-floorstocked medications available in 2 ton minimum.
